

ZEZHAO WANG

Research & Data Analyst · AI Evaluation · User & Customer Insights · Measurement

Doctoral and international research experience spanning instrument development, mixed methods, reliability and validity, cross-cultural fairness, AI-supported speech assessment, and reproducible reporting.

Role fit: Research · Assessment · Measurement · Evaluation

SELECTED EXPERIENCE

Doctoral Researcher · Multilingual AI Speech Evaluation 2022 - 2026

Universitat de València

- Tested whether automated transcripts preserved educationally meaningful learner errors or normalised them into contextually expected language.
- Designed a reproducible workflow combining Whisper ASR, GPT-supported analysis, Python/R, and structured CSV/JSON processing for multilingual learner speech.
- Evaluated automated indicators against human-coded reference using reliability and calibration analyses.
- Converted findings into practical criteria for model selection, human oversight, and educational interpretation.

Researcher · EVALCOMPLIN Multilingual Assessment 2022 - 2026

EVALCOMPLIN · Universitat de València

- Developed and adapted multilingual assessment materials, questionnaires, interviews, and standardised collection procedures.
- Supported school implementation, stakeholder interviews, teacher training, sampling, and documentation.
- Evaluated reliability, validity, group performance, and cross-linguistic comparability across Spanish-, Chinese-, and English-speaking learners.
- Integrated language samples, teacher evidence, and quantitative and qualitative findings into guidance for consistent interpretation.

Visiting Scholar · Multilingual Assessment Sep 2024 - Dec 2024

Stanford Graduate School of Education

- Worked with Professor Guillermo Solano-Flores on multilingual assessment, cross-cultural validity, educational measurement, and fairness.
- Strengthened the interpretation and communication of assessment evidence across linguistic, cultural, and disciplinary contexts.

Research Collaborator · User & Learning Analytics 2025 - 2026

Universitat de València · Universitat Politècnica de València · edX English-language MOOC analytics project

- Identified participation barriers and early disengagement patterns across digital learning pathways.
- Analysed activity, progression, engagement, and feedback for 20,000+ users on English-language MOOCs delivered through edX.

SELECTED PROJECT

Evaluation Data Inspector

Sep 2026

A Python and Streamlit application that turns a CSV into a concise data-quality and descriptive-analysis report, with synthetic demo data, reusable analysis code, tests, and documented deployment paths.

- Accepts UTF-8 CSV uploads and includes synthetic educational evaluation data for a safe walkthrough.

EDUCATION

PhD · Education

2022 - 2026

Universitat de València

Cum Laude · International Mention

Dissertation: A Study on Error-Preserving Automatic Transcription: Validation of a Simplified Tool for Speech Analysis and Oral Language Assessment

Master's degree · Special Education — Speech and Language Support

2021 - 2023

Universitat de València

Bachelor's degree · Spanish Language and Literature

2017 - 2021

Yunnan Normal University

CORE CAPABILITIES

Research design	Surveys & interviews · Mixed methods · Explaining evidence for decisions · Reproducible documentation
Analysis	Data preparation & cleaning · Descriptive statistics · Group comparison · Effect sizes · Regression & calibration · Reliability & validity · Inter-rater analysis · Error classification
Stakeholder work	Research and partner collaboration · Needs clarification · Proposal development · Multilingual professional communication · Implementation and training support
Tools in practice	R · Python · Whisper ASR · GPT-supported analysis · Excel

LANGUAGES

Mandarin Chinese Native	English C2	Spanish C2
Finnish B1	Catalan / Valencian B1	

PUBLICATION

Wang, Z. (2024). Validación de instrumentos de evaluación lingüística traducidos para niños chinos escolarizados en España. Crónica. Revista de Pedagogía y Psicopedagogía, 9, 97-115.
